1935.

THE NEW ZEALAND

JOURNAL OF AGRICULTURE.

VOLUME 50.

(January–June, 1935.)

INDEX.

A.

Adamson, N. J.—Protection of pear-grafts from the pear-leaf-curling midge, 43.
Advisability of strong hives in winter, 253.
Agricultural clubs, boys' and girls', in Wellington District, 73.
Agricultural legislation of 1934, 193.
Allan, H. H.—Notes on recently observed exotic weeds, 96.
Allan, H. H., and Zotov, V. D.—Pampas grass and its identification, 274.
Answers to inquiries, 126, 189, 253, 318, 382.
Aphides affecting cultivated plants, 230, 281, 353.
Apiary, the (monthly notes), 58, 121, 184, 248, 314, 377.
Areas under wheat, oats, barley, and potatoes, 1934–35, estimated, 231.
Asparagus culture, 190.
Aston, B. C.—Live-stock poisoning in New Zealand, 44, 269.
Aston, B. C.; Bruce, J. A.; and Thompson, F. B.—Chemistry of weed-killers, 164.
Auckland Province, farming in the: Observations on farm-management methods, 345.
Auckland Province, pasture top-dressing in, 214.

B.

Barry, W. C.—
Health of farm animals, 340.
The hygenic production of milk on the farm, 129.
Bates, E. M.—Electric tractors, 32.
Blue lupins, seed crop of, in northern districts, 189.
Bronze beetle, control of, 19.
Brien, R. M.—See Gibbs, J. G., and Brien, R. M.
Brown, F. C.—Poultry-keeping (monthly notes), 55, 119, 182, 245, 312.
Bruce, J. A.—See Aston, B. C.; Bruce, J. A.; and Thompson, F. B.
Bush sickness, use of limonite in: Influence of cobalt content, 367.
Butter and cheese, grading of, by overseas countries, 223.
Butter, investigation of feed-flavour in, 135.
Butterfat, costs of producing, 65.

C.

Cabbage-seed beds, control of club-root in, 294.
Calves, worms in, 189.
Canterbury, vines for, 190.
Cattle-tick, control of, 31.
Certification of seed potatoes, 296.
Certification, seed-wheat, 112, 176, 238, 295, 368.
Chamberlain, E. E.—
Verticillium-wilt of potatoes: Its appearance, &c., 86.
Verticillium-wilt of potatoes: Its relation to stem-end discoloration of tubers, and suggested control, 322.
Cheese and butter, grading of, by overseas countries, 223.
Cheese-manufacture, selection of starter cultures for, 107.
Chemistry of weed-killers, 164.
Churning, difficult, 189.
Citrus-culture (monthly notes), 55, 119, 182, 245, 311, 375.
Club-root in cabbage seed-beds, control of, 294.
Commercial orchards, varieties of fruit-trees for, 110.
Competitions, farmers' field, summary of Dominion results, 81.
Connell, R. P.—
The Farm (monthly notes), 48, 113, 177, 239, 306, 369.
Farmers' field competitions: Summary of results, 1933–34, 81.

Control of the white butterfly by *Pteromalus puparum*, progress of, 175.
Costs of producing butterfat, 65.
Cottier, W.—Aphides affecting cultivated plants, 230, 281, 353.
Cow, udder and skin trouble in, 190.
Cox, G. A.—See Whitehead, H. R., and Cox, G. A.
Cross 7 wheat, 328.
Cultivated plants, aphides affecting, 230, 281, 353.
Cussen, C. J. C. — Poultry-keeping (monthly notes), 375.
Cutting of seed potatoes, 318.

D.

Dairy cows, purebred, testing of, 147.
Dairy herds in New Zealand, size and distribution of, 289.
Dairying industry, 1933–34, 254.
Difficult churning, 189.
Diseases, plant: Some notes on, made during visit to Great Britain and Europe, 232.
Dominion Meteorological Office—Weather records, 63, 127, 191, 255, 319, 383.
Donald, H. P.—Sulphuric-acid treatment of mangel seed, 336.

E.

Early weaning of foal, 253.
Earp, E. A.—The Apiary (monthly notes), 58, 121, 184, 248, 314, 377.
Effect of ragwort in silage, 382.
Electric tractors: Field experience in Canterbury, 32.
Equipment, paint for, 126.
Eradication of gorse and utilization of gorse-infested land, 235.
Eradication of some parasites affecting stock, 160.
Estimated areas under wheat, oats, barley, and potatoes, 1934–35, 231.
Everett, P.—The Orchard (monthly notes), 53, 117, 181, 243, 310, 374.

F.

Farm animals, health of, 340.
Farm buildings and equipment, paint for, 126.
Farming in the Auckland Province: Observations on farm-management methods, 345.
Farm, the (monthly notes), 48, 113, 177, 239, 306, 369.
Farmers' field competitions: Summary of Dominion results, 81.
Fawcett, E. J.—
Costs of producing butterfat, 65.
The size and distribution of dairy herds in New Zealand, 289.
Feed-flavour in butter, investigation of, 135.
Feeding-value of karaka berries, 382.
Fields Division—
Certification of seed potatoes, 296.
Locality in relation to seed-potato production, 98.
Seed-wheat certification, 112, 176, 238, 295, 368.
Fifth Science Congress, 305.
Foal, early weaning of, 253.
Fruit-tree rootstocks: Methods of vegetative propagation, 92.
Fruit-trees, varieties of, for commercial orchards, 110.

G.

Galpin, A. J.—Boys' and girls' agricultural clubs, 73.
Garden lawns and playing-greens: Establishment and maintenance, 201.
Gibbs, J. G.—Control of club-root in cabbage seed-beds, 294.
Gibbs, J. G., and Brien, R. M.—The host range of *Phoma lingam*, 172.
Gorse, eradication of, and utilization of gorse-infested land, 235.
Grading of butter and cheese by overseas countries, 223.
Greens, playing, and garden lawns: Establishment and maintenance, 201.
Grimmett, R. E. R., and Shorland, F. B.—Use of limonite in bush-sickness: Influence of cobalt-content, 367.

H.

Health of farm animals, 340.
Hens, provision of nest for, 126.
Hives, advisability of strong, in winter, 253.
Home garden, vines for, 12.
Horticulture Division—Varieties of fruit-trees for commercial orchards, 110.
Horticulture (monthly notes), 59, 123, 185, 249, 315, 378.
Host range of *Phoma lingam*, 172.
Hydatid disease, 78.
Hyde, W. C.—Horticulture (monthly notes), 59, 123, 185, 249, 315, 378.
Hygenic production of milk on the farm, the, 129.

I.

Inquiries, answers to, 126, 189, 253, 318, 382.
Inventions of agricultural interest, 109, 174, 238, 295, 382.
Investigation of feed-flavour in butter, 135.

J.

Jacques, W. A.—Trial of winter forage crops at Massey Agricultural College, 24.

K.

Karaka berries, feeding-value of, 382.

L.

Lawns, garden, and playing-greens: Establishment and maintenance, 201.
Levy, E. B.—Investigation of feed-flavour in butter, 135.
Limonite, use of, in bush-sickness: Influence of cobalt-content, 367.
Live-stock poisoning in New Zealand, 44, 269.
Lloyd George raspberry, 237.
Lonsdale, T. W.—Eradication of gorse and utilization of gorse-infested land, 235.
Lupins, blue, seed crop of, in northern districts, 189.

M.

McCulloch, W. J.—Some observations on the importance of subterranean clover as a pasture species, 37.
McIlwaine, J. E.—
Eradication of some parasites affecting stock, 160.
Hydatid disease, 78.
Madden, E. A.—Garden lawns and playing-greens: Establishment and maintenance, 201.
Mangel seed, sulphuric-acid treatment of, 336.
Manual of rusts in United States and Canada, 46.
Meat-freezing industry, 77.
Method of killing trees, 126.
Meteorological Office—Weather records, 63, 127, 191, 255, 319, 383.
Milk on the farm, the hygienic production of, 129.
Morrison, A. E.—Agricultural legislation of 1934, 193.
Mortality in young pigs, 253.
Muggeridge, J.—Progress of the control of the white butterfly by *Pteromalus puparum*, 175.

N.

Neill, J. C.—Some notes on plant diseases made during visit to Great Britain and Europe, 232.
Nests, provision of, for hens, 126.
Notes on recently observed exotic weeds, 96.

O.

Oat varieties, harvest of 1934, 254.
Orchard, the (monthly notes), 53, 117, 181, 243, 310, 374.

P.

Paint for farm buildings and equipment, 126.
Pampas grass and its identification, 274.
Parasites affecting stock, the eradication of, 160.
Paynter, L.—Citrus culture (monthly notes), 55, 119, 182, 245, 311, 375.
Pasture top-dressing in the Auckland Province, 214.
Pear-grafts, protection of, from pear-leaf-curling midge, 43.
Phoma lingam, host range of, 172.
Pig-raising investigation, Ruakura, 1.
Pigs, mortality in young, 253.
Plant diseases, some notes on, made during visit to Great Britain and Europe, 232.
Playing-greens and garden lawns: Establishment and maintenance, 201.
Poisoning, live-stock, in New Zealand, 44, 269.
Potato, seed, production, locality in relation to, 98.
Potatoes, seed, certification of, 296.
Potatoes, cutting of seed, 318.
Potatoes, taking successive crops of, 318.
Potatoes, verticillium-wilt of: Its relation to stem-end discoloration of the tubers and suggested control, 322.
Potatoes, verticillium-wilt of: Its appearance and cause, &c., 86.
Potato-growing in New Zealand, 257, 359.
Poultry-keeping (monthly notes), 55, 119, 182, 245, 312, 375.
Progress of the control of the white butterfly by *Pteromalus puparum*, 175.
Provisions of nests for hens, 126.
Pteromalus puparum, progress of the control of the white butterfly by, 175.

R.

Ragwort in silage, effect of, 382.
Raspberry, the Lloyd George, 237.
Removal of green discoloration of water, 253.
Review: Manual of Rusts in United States and Canada, 46.
Rodda, T. E.—Ruakura pig-raising investigation, 1.
Rootstocks, fruit-tree: Methods of vegetative propagation, 92.
Ruakura pig-raising investigation, 1.
Rusts in United States and Canada, manual of, 46.
